

SOLSTUDIER  
Kv. Söderarm och Kv. Grönskär Kärrtorp

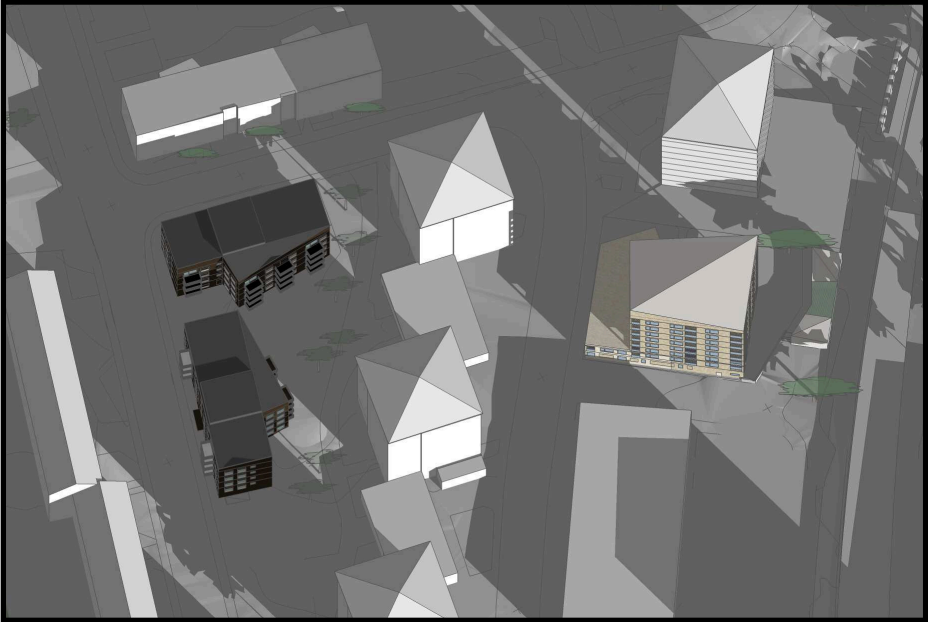

**FÖR SVENSKA BOSTÄDER APRIL 2015**

## INLEDNING

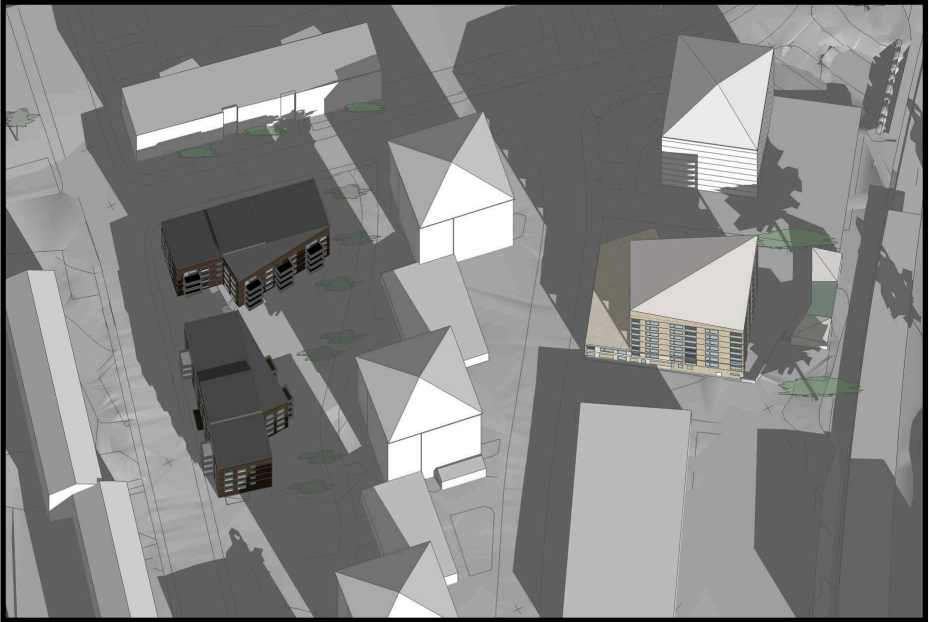

Denna rapport är framtagen för att visa skuggpåverkan på grannfastigheterna vid nybyggnation i kvarteren Grönskär och Söderarm i Kärrtorp. Redovisat finns bilder timme för timme för Vårdagjämning, Midsommar och Höst-dagjämning. Ur dessa kan man utläsa hur skuggorna vandrar över dagen, och under vilka tider angränsande fasader skuggas av den nya bebyggelsen.
